

GIEMME SYSTEM®

è ideale per chiudere **verande, terrazzi, porticati** o dividere **ambienti interni**.

Nei **Negozi, Bar o Ristoranti** un invito irresistibile ad entrare.

La sua apertura crea un ambiente **a contatto con la natura** nei mesi estivi; la chiusura nei mesi invernali crea una facciata trasparentissima che permette di contemplare panorami esterni **al riparo dalle intemperie**.

 Classe massima per **assenza di spifferi**. Tenuta agli agenti atmosferici (UNI EN 14351-1).

 Crea **ambienti utilizzabili tutto l'anno**.

The Giemme System is ideal for closing off **verandas, terraces, porches** or for dividing up **internal spaces**. In **shops, bars and restaurants** it's an irresistible invitation to enter. In the summer months **close contact with nature** is maintained when the Giemme System is open. Meanwhile in the winter, when it's closed, the transparent wall created allows you to **enjoy the landscape outside whilst remaining protected** from the elements on the inside.

 **Maximum classification** for air permeability. Resistance to atmospheric elements (UNI EN 14351-1).

 Creates an **environment that can be used all year round**.

 **Ampliare i propri spazi**
Il pratico sistema di chiusura delle ante consente lo sfruttamento anche nei mesi invernali degli spazi utilizzati durante la bella stagione.

Expands spaces
The practical system of the closing doors allows you to make use of outdoor spaces even in the winter months.

 **Un invito irresistibile ad entrare**
realizza quel contatto diretto necessario tra acquirente e venditore ponendo fine alla barriera tra interno ed esterno.

 **An irresistible invitation to enter**
Creates direct contact between the buyer and seller by putting an end to the barrier between outside and inside.

Senza guida inferiore - Without floor guide rail

Divisori per interni - Internal partitions

Caratteristiche Tecniche. *Technical information*

100% Made in 

Crea ambienti utilizzabili tutto l'anno.
Creates an **environment that can be used all year round.**

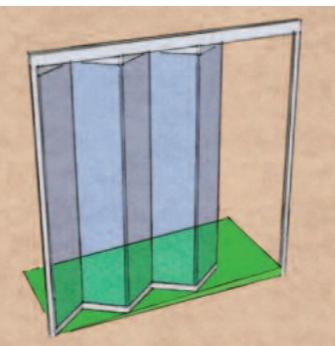

- The moving glass door system is **designed and custom built** with tested materials to ensure both high quality and functionality.

The structure is made from the **primary aluminium** alloy and anodized (20Mm) or painted in polyester powder. The doors in 10mm tempered crystal glass with polished edges slide on rails with special Delrin bearings. The bolts and screws are made from INOX stainless steel. The support structure holds 3000mm. The system can be used in coastal areas.

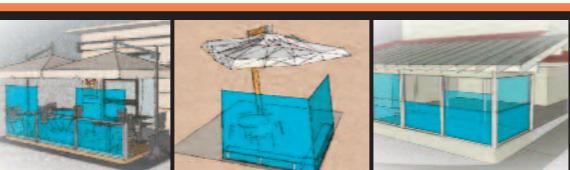

The Giemme System can be constructed to enclose spaces of any type and dimension. **There are no horizontal limitations**. The maximum height is 3000mm. The maximum width of the door panel is 800mm (the entrance doors can be made wider). For a larger height it is possible to use a transom window. There are a selection of door handles, door closers and locks to choose from.

 - Also available without a floor guide rail.** With a **recessed** or **external** floor guide rail and complete with drain system.
 - Creates an environment which can be used all year long.** Conforms to regulations UNI EN 14351-1.
 - Excellent sound insulation.**
 - No need for maintenance.**
 - Suitable for creating bioclimatic greenhouses.**
 - Special detachable hinge** for cleaning the outside of balconies and terraces.
 - Curved angle or all-glass corner. Upper small binary (63 mm) or standard (123)**
